CHARITY AND GIVING

Volume 461 Edited by Justin Healey

print ISBN: 978 1 922274 22 9

ebook ISBN (PDF): 978 1 922274 23 6

As a nation, Australians can be a generous people. In addition to direct financial giving, many Australians donate goods to charities and not-for-profits, or volunteer their time, become involved with fundraising for a specific charity, or advocate and raise awareness for a cause or

unmet need. In Australia there are over 50,000 registered charities which make up a diverse sector working across a broad range of areas, including health, education, social welfare, religion, culture, human rights, the environment and animal welfare. How do you choose the right charity to match a righteous cause, so that your donation really does count? Why do people give, and how can it be done responsibly and effectively? What is philanthropy – could wealthier Australians do more to support the not-for-profit sector? This book explains the latest trends in giving and explores the effectiveness and ethics of legitimate charities. In times of great need, what can we do to make a positive difference?

WORK AND FAMILY

Volume 462 Edited by Justin Healey

print ISBN: 978 1 922274 24 3

ebook ISBN (PDF): 978 1 922274 25 0

It can be challenging and exhausting for working parents to hold down a job while also raising a family. In order to meet the costs of living, families often have two parents engaged in paid work – but at what personal cost? Why are most mothers still earning less at work and doing more

at home than fathers in relation to care and domestic duties? What are the stresses for parents in terms of work-life balance and work-family conflict? And how does child care help families to grow, learn and earn? This book explores the realities of parenting and gender roles, and looks at how workers and employers can maintain sustainable work-family balance through family-friendly, flexible work options. It also reviews the role of affordable child care and how it supports the needs of children while sustaining workforce participation. What are the most effective ways to balance work and family life?

EPIDEMICS AND PANDEMICS

Volume 463 Edited by Justin Healey

print ISBN: 978 1 922274 26 7

ebook ISBN (PDF): 978 1 922274 27 4

The continuing spread of the COVID-19 pandemic is having a devastating impact on human health and economies around the world. However, epidemics and pandemics are not a new phenomenon. Throughout history, civilisation has endured a number of major infectious disease

outbreaks. Infectious diseases, such as seasonal influenza, are more than simply public health issues; they can also have major social impacts, change economies and even alter the course of history. This book explores the health, economic and social challenges presented by the major types of infectious disease, viewed in the context of the continuing fight against the novel coronavirus. It examines how vaccine-preventable diseases are being successfully managed in Australia and also shines a light on the effectiveness of Australia's response to the COVID-19 pandemic through social distancing, lockdowns and other infection control measures. Will the latest COVID-19 vaccines under development be enough to contain the coronavirus? How do we learn the lessons of history, overcome the current pandemic, and better prepare for the next deadly mass outbreak?

DEMOCRACY IN AUSTRALIA

Volume 464 Edited by Justin Healey

print ISBN: 978 1 922274 28 1

ebook ISBN (PDF): 978 1 922274 29 8

In a disrupted time of global pandemic and recession, Australia has never been more reliant on clear leadership from its elected representatives, while also requiring greater co-operation among its citizens. Striking a balance between accountability and robust governance is a challenge during

an era of reduced trust in political leaders by voters, especially among young people. The key principles of Australia's democratic society include individual freedoms, justice, tolerance of opposing ideas and representative government. Do these principles still hold true when research points to a growing disconnect between politicians and the people they represent? This book explains how our democratic system of government functions, examines Australians' levels of trust and satisfaction in their elected leaders, and explores opportunities for democratic reform. How could Australia better function as a modern democratic nation state in the twenty-first century?

PROTECTING YOUR PRIVACY

Volume 465 Edited by Justin Healey

print ISBN: 978 1 922274 30 4

ebook ISBN (PDF): 978 1 922274 31 1

Privacy is a fundamental human right; it underpins our freedom of association, thought and expression, and freedom from discrimination. It includes physical privacy, surveillance and information privacy. However, it is not absolute, it is hard to define, and sometimes harder to

protect. What are the principles and laws that apply to privacy and personal information protection? Although privacy laws have expanded in recent years to deal with emerging technologies, there are still flaws and gaps in Australia's regulation. How do tech giants like Facebook and Google profit from personal data, and how accountable are they to consumers and governments? Security cameras, CCTV, drones, ID scanning, smart home devices, GPS, tracing apps, and facial recognition technology – how much surveillance are you really subjected to by governments, corporations, hackers and law enforcement? This title examines rights and responsibilities in relation to privacy and personal information and shines a light on the growth in digital surveillance. The book also offers advice on how to understand and preserve individual privacy and protect your personal information online. Are we too trusting, at the expense of our precious privacy?

WILDLIFE EXTINCTION CRISIS

Volume 466 Edited by Justin Healey

print ISBN: 978 1 922274 32 8

ebook ISBN (PDF): 978 1 922274 33 5

The Earth is currently experiencing an extinction crisis due to the exploitation of the planet by humans. According to the latest estimates, more than 32,000 species are threatened with extinction, equating to over a quarter of all assessed species. Are we in the midst of a global

mass extinction event? Australia has one of the worst recent extinction records of any continent, with more than 100 species of vertebrates becoming extinct since the first people arrived over 50 thousand years ago; more than 300 animal and 1,000 plant species are now threatened with imminent extinction. Most of Australia's wildlife is found nowhere else in the world, making its conservation even more important. This book explores the state of the world's wildlife and examines the factors which are threatening their survival globally and in Australia, including habitat destruction, overexploitation, wildlife trading, pollution, and the devastating impacts of climate change in the form of droughts and bushfires. What about wildlife conservation? How can humankind better protect the planet's biodiversity – including wildlife and their habitats – to prevent more species from becoming extinct?

RESPONDING TO RACISM

Volume 467 Edited by Justin Healey

print ISBN: 978 1 922274 34 2

ebook ISBN (PDF): 978 1 922274 35 9

The global spread of the Black Lives Matter movement has exposed the profound and wide-reaching impacts of racial injustice. Racism happens in many forms and contexts, ranging from casual to systemic racism, racial vilification and physical violence. This book looks at how the

social cohesion of a culturally diverse nation like Australia is challenged by the complex and incendiary issue of racial discrimination. Topics explored include casual racism, hate speech, cyber racism, Islamophobia, anti-semitism, white supremacist extremism, abuse of Asian people during the coronavirus pandemic, the influence of the BLM protest movement, and the longstanding racial justice calls by Australia's First Nations peoples. Strategies are also offered on how to deal with racial discrimination through legal rights and protections, how bystanders can support people experiencing racial abuse, and how to manage racism in public, at school, in sport, and online. Learn to recognise racism and respond with equality and respect for people of every race, colour and creed.

POSITIVE AND RESPECTFUL RELATIONSHIPS

Volume 468 Edited by Justin Healey

print ISBN: 978 1 922274 36 6

ebook ISBN (PDF): 978 1 922274 37 3

Couple relationships have their ups and downs, however partners should always treat each other with respect, and feel safe. What are the latest trends in couple relationships, and what are the features of a successful, healthy relationship?

This book is aimed at young people and explains the issues around sexual consent, how to effectively communicate and avoid conflict, and how to avoid abuse in couple relationships. Topics include understanding feelings, consensual physical intimacy, safe online dating, handling conflict and disagreements, identifying the warning signs and various forms of partner abuse, violence and coercive control in relationships, and dealing with break-ups. Practise positive behaviours, and relate with respect.

RIGHTS OF CHILDREN AND YOUNG PEOPLE

Volume 469 Edited by Justin Healey

print ISBN: 978 1 922274 38 0

ebook ISBN (PDF): 978 1 922274 39 7

Children and young people have a fundamental right to be heard and taken seriously about matters affecting them. They have the same general human rights as adults, but also possess specific rights that recognise their special

needs and potential. This book explains how these rights are set out in the United Nations *Convention on the Rights of the Child* – the most widely ratified human rights treaty in history. It also examines the state of children's rights in Australia, where there have been some positive developments, but also a number of critical issues and mixed results. The latest progress reports recommend that Australia improves its treatment of vulnerable children in certain areas, including reducing youth detention, raising the age of criminal responsibility, supporting youth mental health, advancing outcomes for Aboriginal and Torres Strait Islander children, caring for asylum seeker and refugee children, addressing child abuse and neglect, and eliminating youth poverty. What are the rights of parents in relation to raising their children, and why is it still legal for adults to hit children as punishment? There is still a gap between the rights Australia has promised vulnerable children and how those rights are implemented. Are the human rights of our children and young people at risk?

UNEMPLOYMENT AND UNDEREMPLOYMENT

Volume 470 Edited by Justin Healey

print ISBN: 978 1 922274 40 3

ebook ISBN (PDF): 978 1 922274 41 0

As the economy undergoes a long road to recovery amid the ongoing pandemic, the devastating impact of the coronavirus on jobs in Australia is becoming clearer. The federal government has managed to keep the current job loss numbers down with

pandemic support payments, however this assistance will soon end and in turn the true extent of joblessness will be revealed. Compounding the problem, the rate of underemployment (people needing more hours) has overtaken the jobless rate, and most new jobs being created are in part-time, casual or insecure gig work, affecting a higher proportion of young people. Meanwhile, government welfare benefits have failed to keep up with the costs of living for a number of years, making life for many people even harder, entrenching financial stress and mental distress, and affecting motivation and skills. Is job insecurity now the norm for many Australians? This book explains the economic fundamentals featuring the latest statistics and report findings. It also explores government and social sector strategies for tackling unemployment and underemployment. Finding a job, and indeed enough employment, can be hard work in itself.

AUSTRALIA'S RELATIONS WITH CHINA

Volume 471 Edited by Justin Healey

print ISBN: 978 1 922274 42 7

ebook ISBN (PDF): 978 1 922274 43 4

The Australia-China bilateral relationship is very significant to Australia, and is mostly based on substantial trade ties. Crucially, China accounts for over a third of Australia's total export income, however diplomatic and economic relations

are currently at a low point. Globally, China is asserting its emerging superpower status and it appears actions by the communist party leadership in Beijing are primarily responsible for the deterioration in the bilateral relationship – however both sides have made mistakes, and Australia is not without fault. China's blunt use of repeated trade sanctions to penalise Australia for real or imagined slights risks the mutually beneficial trading relationship being undermined by damaging political interference. What are the various grievances and points of difference between these two countries? How can Australia serve its own national and strategic interests, and maintain its foreign policy objectives, without needlessly antagonising China? Can we end the trade war and repair relations?

COPING WITH NATURAL DISASTERS

Volume 472 Edited by Justin Healey

print ISBN: 978 1 922274 44 1

ebook ISBN (PDF): 978 1 922274 45 8

Australia's variable climate, geography and environment frequently places communities, infrastructure, ecosystems and cultural and heritage sites in the path of natural hazard events. Natural hazards are driven primarily by weather and geology. Weather-driven natural

hazards include bushfires, floods, heatwaves, cyclones, landslides and thunderstorms, while geological-driven hazards include earthquakes and tsunamis. The climate change-fuelled bushfire chaos of the past year alone has shown how exposed the nation is to natural hazards, causing distressing losses of life and property, and devastating the environment. A recent royal commission has exposed gaping holes in Australia's readiness for natural disasters. How should we better prepare for natural hazards and mitigate their impacts from becoming disasters; and how can we cope during and after they have occurred? What could we do at a government, emergency services, community and personal level to protect ourselves, develop resilience, and recover from the next major natural disaster?
