STOLEN GENERATIONS AND THE WAY AHEAD

Volume 437 Edited by Justin Healey

print ISBN: 978 1 925339 74 1

ebook ISBN: 978 1 925339 75 8

It has been over twenty years since the release of the landmark *Bringing them home* report and more than a decade since the national apology was delivered by then-Prime Minister Kevin Rudd to Stolen Generations survivors – Aboriginal and

Torres Strait Islander Australians who have suffered as the result of past government policies and practices of forced child removal and assimilation. Acknowledging the wrongs of the past was a significant milestone in the history of our nation, but there is still much work to be done to heal the enduring trauma experienced by survivors, families and communities. After two decades, the majority of the *Bringing them home* recommendations have not been implemented, adding to ongoing distress. In the meantime, this inaction fails to address the escalating national crisis involving continuing removal of indigenous children from their families. What is the nation's plan for healing this pain; are we any closer to needs-based funding and a financial redress scheme, dealing with intergenerational trauma and establishing an appropriate policy response? What is the way ahead for 'unfinished business' in the long journey towards healing?

GAMBLING ISSUES

Volume 438 Edited by Justin Healey

print ISBN: 978 1 925339 76 5

ebook ISBN: 978 1 925339 77 2

Almost 7 million Australians are estimated to be regular gamblers, spending money on one or more gambling activities each month. Australian gambling losses amounted to \$24 billion in the past year alone. What are the actual odds, myths and facts behind the chances of winning on poker

machines, racing, sports betting, lotteries, and at casinos and online? What are the warning signs and harms of problem gambling, and what help is available to people affected by it? What restrictions has the government placed on gambling marketing, much of which is aimed at children and young people, across television and radio broadcasts and online? This book reveals the various major forms of gambling activity and expenditure in Australia; it also explores the issues involved in dealing with problem gambling; and investigates gambling advertising and its impacts on young people. Why are Australians the world's biggest gamblers? Are we really winning against the odds?

PORNOGRAPHY AND ITS HARMS

Volume 439 Edited by Justin Healey

print ISBN: 978 1 925339 78 9

ebook ISBN: 978 1 925339 79 6

Nearly half of Australian children aged 9-16 years experience regular exposure to sexual images via the media, online and hand-held devices. Pornography does not exist in a digital vacuum, but rather within a broader social context which reinforces sexual attitudes, beliefs and stereotypes

about gender, sexism, sexual objectification, unsafe sexual health practices and violence-supportive attitudes. What are the impacts of porn? How do young people navigate the risks and realities of intended and accidental exposure to explicit content? This resource sensitively handles topics including 'sexting' and image-based abuse, age verification, parental controls and communication with teens about pornography. The book also explores interventions and initiatives aimed at educators, parents and young people to address the harms of pornography through promotion of online safety practices, critical thinking and discussion. How do we deal with the harms of early access to pornography and in turn promote appropriate digital and sexual literacies for young people and their developing sexuality? Sex sells – but if it is so freely available and left to its own devices – at what price?

PLASTIC POLLUTION

Volume 440 Edited by Justin Healey

print ISBN: 978 1 925339 80 2

ebook ISBN: 978 1 925339 81 9

Plastic products and packaging are integral to modern daily life. Plastic is durable, cheap, light and can be flexible or rigid, with multiple uses – however plastic is also making the planet a victim of its own success. Plastic pollution has become an epidemic, afflicting land, waterways, coastlines and oceans. More than 8 million tonnes of plastic enter the world's oceans each year, killing marine life as it breaks down into billions of microplastic pieces, without decomposing. Consumption of plastic has increased exponentially, but while recycling is well established, only a small proportion of plastic is recovered for recycling or energy recovery. How can we reduce the amount of plastic waste, increase recycling and minimise impacts on the environment? What are governments, industry, retailers and consumers doing to eliminate the use of plastic packaging to reduce landfill waste and ocean pollution? This book offers confronting facts on the impacts of plastic, but also features strategies aimed at tackling plastic pollution. Now is the time to save our planet from the growing perils of plastic.

GLOBAL POVERTY AND WEALTH INEQUALITY

Volume 441 Edited by Justin Healey

print ISBN: 978 1 925339 82 6

ebook ISBN: 978 1 925339 83 3

Despite marked progress in poverty reduction over recent decades, the number of people living in poverty remains unacceptably high. More than 790 million people live in extreme poverty, surviving on less than \$1.90 a day. Why is there still so much poverty in the world; how is it measured; and what is being done by way of trade, debt relief and aid to achieve the United Nation's Sustainable Development Goal 1: End poverty in all its forms everywhere? By contrast, many around the world have never had it so good. Global income and wealth inequality are on the rise: 82% of the wealth generated last year went to the richest 1% of the global population, while the poorest half of the world's people saw no increase in their wealth. Just eight men own the same wealth as half the world. What are the causes of this staggering inequality, and how can we achieve the UN's Sustainable Development Goal 10: Reduce inequality within and among countries? Using data and analysis from the latest key reports, this book provides an overview of the extremes between wealth and poverty. Can the world afford to let this gap widen any further?

REPRODUCTIVE ETHICS

Volume 442 Edited by Justin Healey

print ISBN: 978 1 925339 84 0

ebook ISBN: 978 1 925339 85 7

Assisted reproductive technology (ART) is a group of procedures used to assist people in achieving a pregnancy. Recent advancements in the use and availability of ART treatments such as in vitro fertilisation (IVF), gamete intrafallopian transfer (GIFT), gamete donation and surrogacy have raised numerous ethical considerations. This book explores reproductive concerns and opposing opinions on a range of issues including: the ethics of IVF treatment for older women; success rate claims of commercial clinics; access by IVF offspring to the identities of their donor parents; the fate of excess frozen embryos; public funding of IVF; payment for egg and sperm donation; 'social egg freezing' by younger women delaying motherhood; the dilemmas of preimplantation genetic screening; the sex selection debate; collection of gametes and embryos from dying and deceased loved ones; and commercial surrogacy arrangements. Are existing guidelines and laws in Australia in step with the many ways we can now reproduce ourselves? Or are we going too far in dictating the terms of human fertility?

UPCOMING RELEASES – July 2019

PHYSICAL INACTIVITY

Volume 443 Edited by Justin Healey

print ISBN: 978 1 925339 86 4

ebook ISBN: 978 1 925339 87 1

Only about a third of children and under half of adults are meeting Australia's Physical Activity and Sedentary Behaviour Guidelines. Most children exceed the recommended amount of screen-based activity time, while time spent sitting at leisure goes up in adults as they get older. Inactivity increases overweight and obesity, raising the risk of chronic and life-threatening diseases like cardiovascular disease, dementia, type 2 diabetes and some cancers. Regular physical activity not only reduces health risks, it improves social and emotional health and wellbeing. Which groups of inactive Australians are most at risk of lifestyle-related illness? What levels and types of activity are required for optimal health at each life stage, and how can we incorporate regular activity into our daily lives? This book explains the risks and consequences of physical inactivity, and in turn promotes the benefits of being active. It's time to move it, or lose it.

FOOD INSECURITY AND WASTE

Volume 444 Edited by Justin Healey

print ISBN: 978 1 925339 88 8

ebook ISBN: 978 1 925339 89 5

Australia is a prosperous country, yet there remains a sizeable portion of the population who lack a regular supply of nutritious and affordable food, either going hungry or relying on assistance from charities and food banks. In the past year alone, more than four million Australians have been in a situation where they have run out of food and have been unable to buy more. Conversely, we also waste a lot of food right through the supply chain; the cost of food waste to the national economy is a staggering \$20 billion each year. What are the many ways in which we can reduce our own food waste? How can Australia address the needs of people who are food insecure, and by the same token minimise food waste, to encourage an equitable *and* sustainable approach to food? We could do more to live by the old adages, 'you are what you eat' and 'waste not, want not'.

INDIGENOUS PEOPLE AND CRIMINAL JUSTICE

Volume 445 Edited by Justin Healey

print ISBN: 978 1 925339 90 1

ebook ISBN: 978 1 925339 91 8

Indigenous Australians are the most incarcerated people on Earth. Aboriginal and Torres Strait Islanders make up 2% of all Australians, yet constitute 27% of the nation's prison population. Over-representation in the criminal justice system by indigenous men, women and young people is a persistent and growing problem. What are the reasons for these high imprisonment rates; and what reforms are being proposed to reduce indigenous people's contact with the criminal justice system? Are 'tough on crime' policies flouting death-in-custody recommendations and further entrenching indigenous inequality and disadvantage before the law? After the recent Royal Commission, prompted by shocking abuses at the Don Dale detention centre, has anything changed in relation to youth detention? This book examines the latest research on indigenous imprisonment rates, and reviews progress on addressing Aboriginal deaths in custody and youth detention reform. How can governments reduce over-incarceration and commit to working with Aboriginal and Torres Strait Islander communities to implement overdue interventions? What will it take to unlock the problems of indigenous inequality in the criminal justice system?

POVERTY AND INEQUALITY IN AUSTRALIA

Volume 446 Edited by Justin Healey

print ISBN: 978 1 925339 92 5

ebook ISBN: 978 1 925339 93 2

Australia has experienced its longest ever period of economic growth over the last quarter century. Yet, there is growing debate about the distribution of benefits from this growth, and the extent to which inequality is increasing. One in eight adults and more than one in six children are living in poverty, while the share of income going to the top is growing at the expense of low- and middle-income earners. Inequality extends beyond income to educational, postcode, intergenerational and technological inequality – all of which are at the core of opportunity. How are poverty and inequality measured; what are the features of deprivation experienced by people living with entrenched economic disadvantage, struggling with rising costs of living and housing pressures, reliant on social security and charity? Is Australia, long seen as the land of the egalitarian 'fair go', now a divided nation of 'haves' and 'have-nots'? How do we tackle economic disadvantage and poverty, and promote fairness and opportunity for all?

STRESS AND YOUNG PEOPLE

Volume 447 Edited by Justin Healey

print ISBN: 978 1 925339 94 9

ebook ISBN: 978 1 925339 95 6

Most people suffer from stress at some point in their lives, yet it affects people in different ways. A certain level of stress is necessary to motivate us to reach our potential, however if we experience too much stress, it can become a serious health concern. This book is a useful guide aimed at helping Australian teenagers and young people to identify and understand stress and its impacts on their mental and physical health. It features a range of tips, strategies and tools for managing and reducing stress, including relaxation techniques. This title also dedicates a chapter to handling exam stress, showing readers how to reduce stress caused by study pressures and most effectively prepare for exams. Learn how to stress less and be at your best under pressure.

MEDIA LITERACY IN THE DIGITAL AGE

Volume 448 Edited by Justin Healey

print ISBN: 978 1 925339 96 3

ebook ISBN: 978 1 925339 97 0

Many of us, particularly young consumers, are constantly connected online and increasingly informed by digital media. For the first time, Australians' use of online news has surpassed traditional offline news sources. In this confusing age of misinformation, how do we make sense of media messages? Media literacy and education are essential tools; we need to be able to tell fact from fiction in news that is rapidly and pervasively generated by multiple sources via websites and digital platforms, including social media. This book is a timely guide aimed at teachers and students, featuring expert advice on how to promote the necessary skills to access, understand, question, critically analyse and evaluate digital media. If we are to be well-informed and entertained by online content, it is important that we understand the news media environment and our engagement with it, in all of its factual, social and ethical dimensions. How is 'fake news' spread, and how can you detect it? What sources should you trust, and why?
